

I respectfully urge you to reject petition 04-160. Satellite radio is a service that I pay for and I am insulted that the NAB is trying to use the government to dictate what I can and can't listen to, instead of competing for my business fairly. XM Radio carrying local weather & traffic is no different than The Weather Channel or CNN reporting local info to me in competition of my local television stations. Please don't set a precedent by allowing the NAB to control the airways.

Sincerely,

Brian Sheinberg
